**DETAILED ACTION**

***Election/Restrictions***

1. Claims 1-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 24, 2005.
2. Applicant's election without traverse of Claims 12-40 in the reply filed on October 24, 2005 is acknowledged.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 12-36, drawn to a bent elongated perimeter light and a system for mounting perimeter lights to a body having straight and curved surfaces, classified in Class 362, Subclass 224.
  - II. Claims 37-40, drawn to an apparatus for bending a perimeter light, classified in Class 65, Subclass 108.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are unrelated. In the instant case Invention II as claimed can be used to make a materially different product such as a glass perimeter/border, whereby the glass may be heated a first time to make it pliable; provided a radius tool having a curved surface with a shape and radius for the desired bend in said glass perimeter; mounting the heated glass perimeter to said radius tool curved surface; cooling the glass perimeter; and removing the glass perimeter from said radius tool. It is clear that

Art Unit: 2875

one could provide a number of means to bend the perimeter light. More importantly, it should be noted that Claims 37-40 should have been originally grouped together with Claims 1-11 in the previous restriction requirement, since it is obvious that Claims 1-11 are the method claims for the apparatus defined in Claims 37-40.

### ***Conclusion***

The separate inventions and species, as described above, would require multiple and distinct searches, thus, placing an unnecessary burden on the examiner.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
